

RETROFITTABLE AT ANY TIME!

"You want to swim endurance without having to turn around all the time?"

You already have a pool and would like to upgrade it with a powerful counter-flow system without much effort? EasyStar - the modern retrofit system has been specially developed for this purpose. It offers the full performance and all functions as the flushfit, inwall HydroStar turbine driven counter-flow-system. EasyStar is simply installed on the edge of the pool by a custom made bracket and through its modern, dynamic design it fits perfectly into your surroundings.

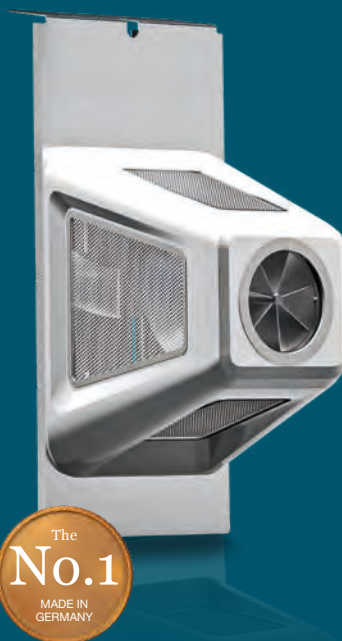

Localised pressure created by conventional counterflow systems

Broad, even over- and undercurrent thanks to EasyStar

EasyStar ... pure vitality!

-  Optimal swim training
-  Natural counter flow
-  No splashing water
-  Easy to retrofit
-  Energy-efficient operation
-  No noise, no vibrations
